COLONIC (COLON HYDROTHERAPY)

• (1 SESSION/60MIN) IDR 1000K

• (3 SESSIONS) IDR 2,850K

Don't be shy, we all need it!

Colon hydrotherapy is a safe, gentle infusion of warm filtered water into and out of the rectum and large intestine using no chemicals or drugs. To alleviate anxiety, it is helpful to familiarize yourself with the colon hydrotherapy procedure:

- To begin, the therapist will suggest a trip to the restroom to empty the bladder.
- After disrobing from the waist down, you will lie comfortably on a warm padded massage table and be given a sheet to drape over yourself. At the foot of the table is the colon therapy unit that disburses the purified water.
- The therapist will gently insert a lubricated speculum approximately two inches into the rectum. There are two tubes extending from the outer part of the speculum. Through one of the tubes (the inflow tube), gravity-fed multifiltered water is infused into the large intestine.
- You will release immediately through the outflow tube through a closed system upon feeling full, allowing for a series of fill and release cycles. Waste material and water are expelled through the outflow tube directly into a special pipe that goes straight to the sewer line, leaving no odor behind. The hydrotherapist may use various massage techniques and pressure points to encourage the abdomen to release.

To ensure safety, the tubes and speculum are disposable. The session usually lasts for one hour, while the process itself takes 40 to 50 minutes.

HOW DO I KNOW COLON HYDROTHERAPY WILL BE USEFUL FOR ME?

Today's diet consists of greatly refined processed food high in saturated fats and low in fiber. We believe that eating these foods, overeating, and ignoring the call to eliminate stress, allergies, and medications can contribute to poor colon health. The colon contains the largest concentration of bacteria in the body. Waste material allowed to stagnate alters the proportion of friendly bacteria to unfriendly bacteria, disrupting the balance of microorganisms essential to the health of the colon and the body in general.

Symptoms such as constipation, diarrhea, gassy, and bloating, as well as headaches, migraines, skin problems, chronic pain, inflammation, or gastrointestinal pain may be signs of a colon distress. In some severe cases, it may be necessary to consult a physician. We believe that colon hydrotherapy is valuable in minimizing the effects of both dietary and environmental stresses and toxins that bombard us on a regular basis and can lead to immune system imbalances. That portion of the immune system residing in the intestine may rejuvenate once the toxic waste materials are removed.

WHY DO PEOPLE RECEIVE COLON HYDROTHERAPY?

- Athletes have opted for colon hydrotherapy to improve metabolic efficiency, endurance, and aesthetically improve visual definition of abdominal muscles.
- Many receive the treatments during a period of lifestyle change or as a preventive measure.
- Many find it extremely helpful in weight loss and balancing metabolism when combined with healthy eating AND exercise. This is due to the increase in energy after the body releases so much toxic material and fecal weight. Nutrient absorption is also increased, which in turn supplies vital energy to all the cells.
- Another group elects to receive colon hydro-therapy after manifesting symptoms of intestinal distress: constipation (some from prescription drugs), indigestion, diarrhea, gas, bloat, hemorrhoids, Irritable Bowel Syndrome, diverticulitis, colitis, parasites, skin conditions such as psoriasis, shingles, and eczema, inability to lose weight, and scar tissue and adhesions from surgery.
- Another group chooses this treatment for a pain motive: abdominal pain, continuous headaches and migraines, back or shoulder pain, aching joints, gout.
- A number of clients' immune systems are compromised with lupus, MS, rheumatoid arthritis, arthritis, cancer, chronic fatigue, Epstein-Barre, candida, infections, colds, or influenza.
- Colon hydrotherapy sessions are used for medical reasons: colonoscopy preparations, pre- and post-surgery or Barium X-Ray, stool samples, and geriatric.
- Some come in during a fast, a cleansing program, a raw food diet, a liver and/or gallbladder flush, or a recovery from an accident.
- Some are working on emotional issues that they feel are physiologically rooted in their intestines (solar plexus).

**Special for colonic subject to 10% government tax only*
